

TECHNICAL DATA SHEET

Bullman Drum Pallet Ramp

The ribbed, non-skid surface of this ramp allow for additional traction when loading drums with a hand truck. The 10-degree slope is easy to maneuver and the polyethylene construction won't rust or corrode.

PRODUCT SPECIFICATION

- A non-slip surface to prevent drums from sliding
- A sloped surface that is easy to roll drums on
- Raised sides to prevent drums from rolling off
- A sturdy construction that can support the weight of drums

| Model | Name | Material | Dimension | Load Capacity |
