- Dimensions 40 cm x 50 cm.
- Absorbency per pad 0.6 liters.
- Pack quantity 100 Pieces.
- Packaging in a bag.

Bullman universal absorbent pad light weight are an all-purpose clean up product for oils, coolants, solvents and water-based fluids anywhere in your facility. They can be used around machinery, under leaky pipes, in messy traffic areas or for general maintenance.

Absorbent pads come both individually (sold by the case) and in box. Supplied in large quantities, pads geared toward all purpose use for wiping up or absorbing small leaks, placement in spill kits, and even to reduce slip and fall dangers.

They're made from melt blown polypropylene. Oil and water absorbent pads (which are grey in color) are made from melt blown polypropylene. That is treated with a surfactant that allows them to absorb both water and oil.

The universal absorbent pads are a must have if you work in an industrial or automotive setting, or really anywhere in which an oil or water spill is likely.
